Also available in the Oasis range

ecomax

Need more space without increasing compound footprint?

Today's sites have a need for more office and welfare space from day one of a new site. Our double-stacked EcoMax instant start site set-up provides the solution in a unique way..

powerstation

The solution to a cable-free site is finally here...

Our new PowerStation unit has been specifically designed to provide a safe space to charge multiple battery-powered construction tools and equipment.

Vision19

You choose – instant start 2+1 toilet block and shower or faith toilet?

Our Vision 19 range is now available with the addition of a shower or faith toilet, to cater for all your staff's requirements.

Advanté is a Partner of the Supply Chain Sustainability School

The School is a multi-award-winning initiative representing a common approach to addressing sustainability within the built environment; driving improvements in knowledge and skills throughout the value chain.

Over 90 contractors, clients and suppliers back the School and actively recommend it to their own supply chains, with 35,000+ users already registered.

Members have access to tailored assessment and action planning tools, as well as CPD-accredited events, e-learning and other online resources.

Membership is free, thanks to funding from the Partners. For more information and to sign up, please visit: www.supplychainschool.co.uk or call 020 7697 1977.

For your peace of mind

Useful points to remember

Terms of hire

- Construction Plant-Hire Association Model Conditions – No other terms will be accepted without prior written agreement from Advanté.
- The EcoLogic range of units are non-mechanical plant.

Daily checks

- The client is responsible for the required daily checks on the generator, including engine oil as per manufacturer's recommendations. This is normal practice with any mechanical plant.
- Damage arising from failure to carry out the checks will be charged.

Damage

- Damage and shortages will be charged to the client.

Levelling

- The unit will be levelled upon delivery, and the client is responsible for maintaining the unit in a level position at all times. Failure to do so could result in engine damage.

Permissible load on the unit

- Available power after appliances and services is 500 Watts for client use. Drawing or trying to draw more than this will damage the generator.

LPG

- The client is responsible for changing the bottles as required; space is provided for the storage of up to two additional bottles if needed.

Canteen electrical equipment

- Both the microwave and kettle within the unit will be delivered to site PAT tested.

Water refills

- These are the client's responsibility, but can be arranged by Advanté if required. (Price on application.)

Waste

- Only normal toilet waste must be put in the toilet. Any contamination of the waste could result in additional disposal charges for the client.

Instruction Manual

- Full instructions on how to get the best from your unit and its operation can be found in the unit.
