- Drying Room
- Toilet(s)

SAVE ON YOUR SITE'S COMPOUND FOOTPRINT, RUNNING COSTS AND CARBON EMISSIONS

Oasis instant start site set-up

Today's sites have a need for more office and welfare space from day one of a new site, while taking up the lowest possible footprint.

EcoMax provides the solution to this in a unique way. It's powered via the same proven technology that's in our EcoLogic range, which gives high fuel efficiency.

The all-new framed staircase (another Advanté patented invention) means set-up is quick and more importantly very safe.

Once in place, the set-up can easily be relocated, giving total flexibility, an advantage which in itself can bring large savings on project costs.

First floor

- Large open plan Office/Meeting Room
- Option of Separate Manager's Office
- Space in main office for four desks
- The first floor is fuelled from the ground floor unit, giving significant running cost savings when compared to running two individual units

Ground floor

- Various layouts available to suit your particular site needs
- Option of unit with shower available
- Silent overnight heating system in drying room – happy neighbours!
- Option of male/female toilet facilities

Specification

- LED lighting with PIR operation
- Solar technology incorporated
- Fully programmable heating system – independent heating system for ground and first floor

Useful points to remember

Terms of hire

- Full Terms & Conditions at www.advante.co.uk/terms-and-conditions – No other terms will be accepted without prior written agreement from Advanté..

Daily checks

- The client is responsible for the required daily checks on the generator, including engine oil as per manufacturer's recommendations. This is normal practice with any mechanical plant.
- Any damage arising from failure to carry out the checks will be charged.

Damage

- Damage and shortages will be charged to the client.

Levelling

- The unit will be levelled upon delivery, and the client is responsible for maintaining the unit in a level position at all times. Failure to do so could result in engine damage.

Permissible load on the unit

- Available power after appliances and services is 500 Watts for client use. Drawing or trying to draw more than this will damage the generator.

LPG

- The client is responsible for changing the bottles as required.

Canteen electrical equipment

- Both the microwave and kettle within the unit will be delivered to site PAT tested.

Water refills

- These are the client's responsibility, but can be arranged by Advanté if required. (Price on application.)

Waste

- Only normal toilet waste must be put in the toilet. Any contamination of the waste could result in additional disposal charges for the client.

Instruction Manual

- Full instructions on how to get the best from your unit and its operation can be found in the unit.

Nationwide delivery (UK mainland)

Need extra drying room space?

For those sites who need to provide additional drying room space and lockers, our EcoMax Dryer is an optional extra to be used in conjunction with our EcoMax 32 or EcoMax 24.

The EcoMax Dryer is fitted with solar panels. In low light situations, the unit is automatically powered from the main set-up.

Worried about ground pressures?

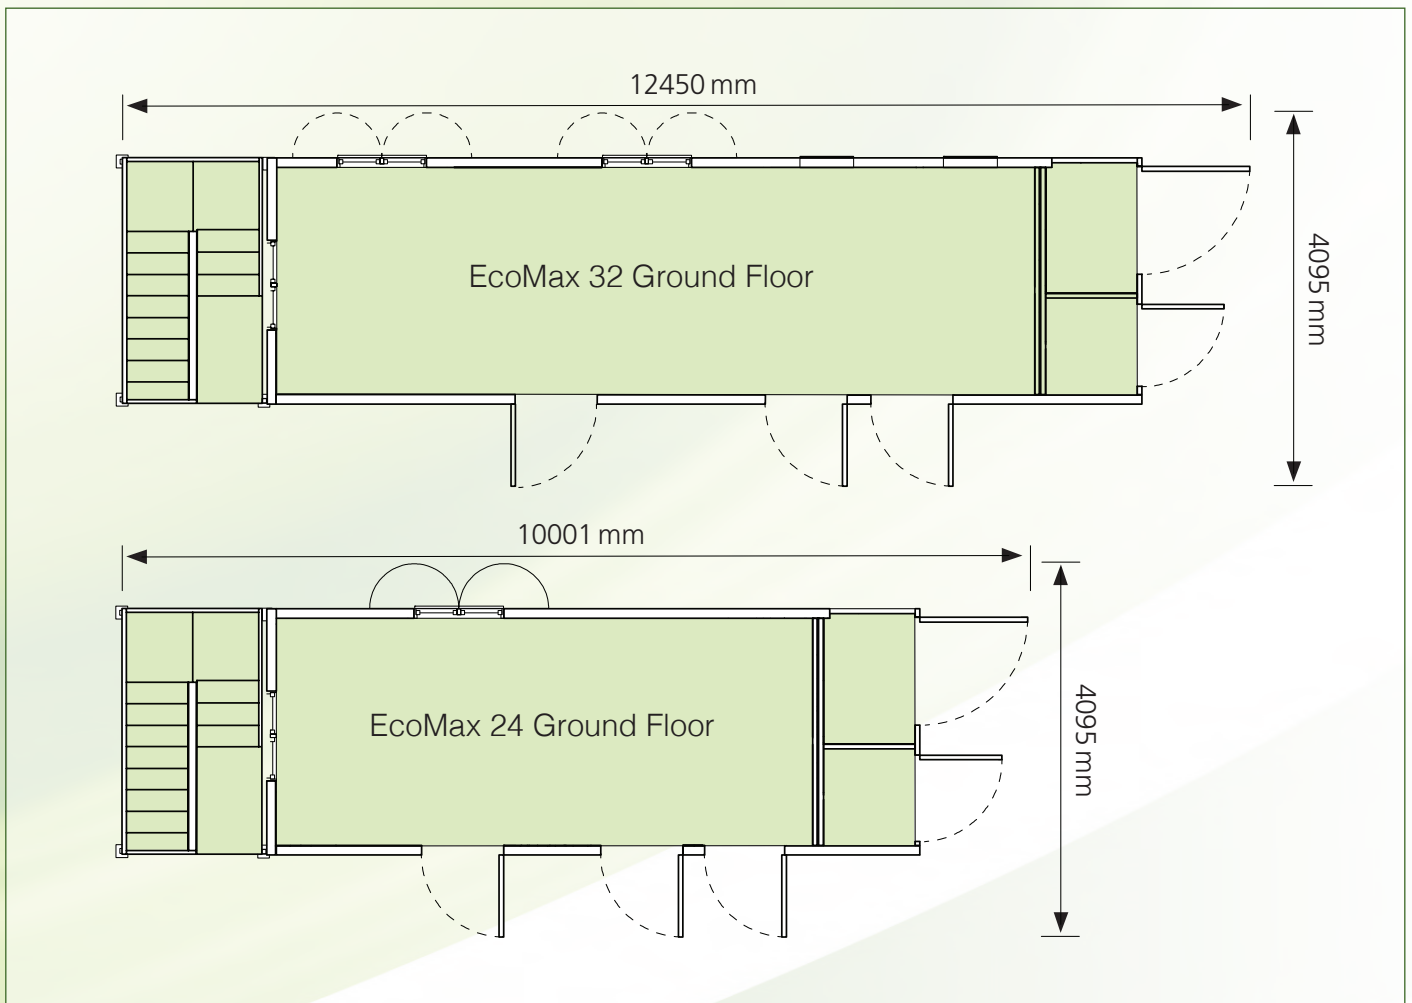

Our EcoMax 32 and EcoMax 24 instant start set-ups are installed with EcoMax spreader pads, making the ground pressure of the double-stacked units the same as one unit would be.

Staircase

The all-new framed staircase (another Advanté patented invention) means the erection of the set-up is quick and more importantly, very safe. The staircase is fixed to the double-stacked units, making it very stable and secure.
