Delivering sustainable welfare

Welcome

Pioneer and market-leading supplier of Oasis ‘instant start’ welfare units, Advanté’s innovation success is driven by the ever-changing welfare and sustainability needs of the Construction Industry.

Since the first Oasis unit in 1998, Advanté continues to work closely with long standing and new business partners to ensure construction sites receive high-quality welfare that meets the needs of staff, site, community, and the environment.

Advanté focuses on decarbonising instant start welfare through new technologies to support their clients’ ESG Sustainability aims and individual Net Zero targets.

Oasis Welfare offers an extensive range of robust, reliable, and renewable solar hybrid welfare units with proven carbon saving results that use smart telemetry and energy efficient power systems.

In addition to supplying self-contained welfare for agile working, Advanté also offers multi-battery charging, specialist transport and lifting, and modular/AV solutions for enhanced project planning and flexibility on site.

At Advanté, sustainability is more than just a responsibility - it’s a core value that aligns with our mission to lead the way in providing low-carbon, solar-powered site welfare and space solutions for the construction industry and beyond.

SOLAR ecologic

Amazing Solar Welfare

EcoLogic Solar welfare units are completely self-contained, static welfare units powered with renewable solar and hybrid technology.

All-in-one instant start welfare facilities ensure work can begin straight away, particularly where connection to mains electric and services are not available.

Each EcoLogic Solar welfare unit contains office and/or canteen facilities, a 24/7 drying and changing room (silent overnight heating) and toilet facilities.

Renewable Solar Energy

Hybrid LPG Technology

PIR sensors LED lighting

Intelligent Telemetry

Remote Unit Monitoring

Site Specific Curfews

DIESEL FREE WELFARE

Advanté's extensive welfare unit range offers various layouts and sizes to suit every site's project requirements.

Oasis EcoLogic Solar Welfare

SOLAR ecologic

Did you know ?

...Our Oasis SOLAR Welfare units run on daylight, not just sunlight.

> I was impressed with the cabins, especially with the amount of solar power produced. It was a joy not having to work in the cabins with the constant drone/vibration of a generator running in the background.
>
> **Works Manager, Morgan Sindall Infrastructure.**

EcoLogic Solar welfare units have proven results averaging 95.2% carbon-free electrical power over a whole year, in all weathers and work environments.

These innovative solar units are highly energy efficient and mainly silent, enhancing the wellbeing of those working on site, and of those working or living in the community.

EcoLogic Solar hybrid technology harnesses daylight to generate impressive renewable electrical power all year round. Helping clients meet their ESG Sustainability and Net Zero targets..

91.3% RENEWABLE ENERGY

91.3%* electricity delivered from solar and stored energy all year reducing fuel costs

93.1% SILENT RUNNING

Unit runs silently 93.1%* of the time, enhancing community and work environment

IMPROVED AIR QUALITY

LPG produces less particulates than diesel contributing to improved air quality

REDUCED CARBON CO_2 FOOTPRINT

Minimal generator run time resulting in substantial reduction in carbon footprint

* Data taken from Advanté telemetry across all solar units on hire 1/1/21 - 1/1/25. Renewable energy only for electrical use excludes heating.

Real Results
Our telemetry data is taken from solar units hired in all weather across the UK

> Advanté Ecologic Solar is the way forward in the 21st Century. Its silent, carbon -free and has minimal impact on the environment. They serve the site team with fantastic facilities that any team should have at the start of any project. It does exactly what it says on the tin – best ever welfare unit in the market.
>
> **Senior Site Manager, BAM Construction Ltd.**

What's inside your unit?

- ✔ Office and/or canteen facilities
- ✔ Sink, kettle, microwave
- ✔ 40ltr drinking water
- ✔ 24/7 drying & changing room
- ✔ Silent overnight heating
- ✔ Toilet(s)
- ✔ Washbasins

SOLAR ecomax

Unique Double-stacked Solar Welfare

EcoMax Solar is the first and only double-stacked instant start welfare setup of its kind. It is powered by proven EcoLogic Solar hybrid technology, incorporating a large solar array on the roof.

The framed staircase (another Advanté patented invention) means it is safe and quick to set up. Once in place, your EcoMax Solar welfare units can be easily relocated, giving total flexibility and reduced project costs.

Did you know?

...Each EcoMax Solar setup is fully self-contained and specifically designed to meet the welfare needs of staff for the entirety of a project.

Oasis EcoMax Solar Welfare

Main features

RENEWABLE ENERGY

SILENT RUNNING

IMPROVED AIR QUALITY

REDUCED CARBON FOOTPRINT CO_2

First Floor:

- Large open-plan Office/Meeting Room
- Separate Manager's Office
- Space in the main office/meeting room for up to four desks.
- First floor is connected to the ground floor unit, giving significant running cost savings when compared to running two individual units

Ground Floor:

- Various welfare layouts available
- Shower options also available
- Full changing and drying room
- Silent overnight heating = happy neighbours!
- Two Toilets = male/female split

"The Advanté cabins provided a comfortable and efficient workspace for our team. The self-contained feature saved us valuable time and costs associated with plumbing and waste management."

Works Manager, Morgan Sindall Infrastructure

- **Reduction of Carbon Emissions**
- **Intelligent Telemetry**
- **Remote Unit Monitoring**
- **Site Specific Curfews**

> In terms of performance, the units came fully stocked and in excellent condition, allowing us to make an immediate start. They have also been impressively efficient; the generator very rarely goes on thanks to the solar panels on the roof and it is quiet in operation in any case, which our neighbours appreciate.

Senior Build Manager, Willmott Dixon Interiors.

Oasis EcoLogic Hybrid Welfare

EcoLogic welfare units are completely self-contained static welfare units powered by Advanté's impressive EcoLogic Hybrid power system and solar panels. These units are highly energy efficient.

The EcoLogic Hybrid power and smart telemetry systems are designed to limit use of the hybrid LPG generator to reduce carbon emissions and running costs, while providing mainly silent welfare facilities.

Each welfare unit will provide your site with an office and/or canteen, a drying room (silent overnight heating) and toilet facilities in just one unit.

Did you know ?

...All Oasis EcoLogic welfare units are powered by a hybrid LPG power system and solar panels..

Sustainability Features

- Solar & hybrid LPG generator powered
- Low CO^2 emissions = Reduced carbon footprint
- Mainly silent running welfare unit
- Silent overnight heating & drying room
- Improved energy efficiency

"We look to make carbon reductions on site in all ways we can as part of our sustainability plan. Because you can't see the solar panels it is easy to forget that they provide most of the energy we use to power the bits in the unit during the day – even in the winter. The Oasis EcoLogic units have always given us that advantage in terms of low carbon welfare provision."

Senior Site Manager, Taylor Wimpey.

vision solar

Vision Solar is the next generation of Oasis Vision toilet blocks.

Taking our clients one step closer to Net Zero with more renewable solar energy.

These high-quality, inclusive toilet facilities significantly reduce emissions and enhance air quality.

Powered by impressive Oasis Solar hybrid technology that delivers mainly silent and renewable electrical energy. Including lighting, heating, hot water, and hand dryers.

This 2+1 Vision Solar instant start toilet block provides self-contained toilet facilities for up to 60 staff on site.

Key Features

- ✔ **3 Toilets, 3 Washbasins, 2 Urinals**
- ✔ **Solar hybrid technology**
- ✔ **Smart telemetry**
- ✔ **Safe fixed entry stairs**

vision solar access

Increase accessibility for *all* on site

Vision Solar Access is the first of its kind to offer fully accessible instant start 2+1 toilet facilities to construction sites across the UK. Increasing accessibility and inclusivity for all.

With all the benefits of Vision Solar, plus more. Each unit is powered by our impressive Oasis Solar hybrid technology to further support our clients towards their carbon reduction and ESG Sustainability goals.

Access features

- ✔ **Inclusive**
- ✔ **Ramp access**
- ✔ **Automatic door sensors**
- ✔ **Accessible toilet and washbasin**
- ✔ **Handrails and emergency cord**

Oasis Toilet Blocks

vision

The Vision toilet block will provide your site with self-contained 2+1 toilet facilities for a large and diverse workforce on site.

This fully HSE compliant instant start unit provides toilets for up to 60 staff.

Our standalone Vision toilet block range is available with the choice of an additional shower or faith toilet (pictured right), to cater for all your staff's needs.

Benefits to site

- ✔ **High quality facilities enhance wellbeing.**
- ✔ **Inclusive and separate cubicles.**
- ✔ **Ready for use once delivered.**

TOILETS solarGO

Generator-free solar toilets

Oasis SolarGo Toilets utilise renewable solar energy to deliver 100% silent and generator-free instant start toilet facilities.

Helping you to provide high quality, sustainable welfare for staff on site, while reducing environmental and community impact.

Renewable energy from the solar panels powers all electrical loads in the unit.

Three cubicles, **Two** toilets, **One** urinal…**GO!**

Why SolarGo?

- ✔ **Compact footprint**
- ✔ **Self-contained**
- ✔ **Solar technology**
- ✔ **No generator**

Benefits

- ✔ **Carbon reduction**
- ✔ **Silent operation**
- ✔ **Inclusive facilities**
- ✔ **Staff wellbeing**
